Description:

This course builds upon what you have learned in Web Publishing with FrontPage 2000 (I) to teach you how to develop a more sophisticated Web site using some of the more powerful features of FrontPage 2000. Starting out, you will quickly create a new web from scratch using the file import command, and you will learn how to create and use shared borders. You will then learn how to incorporate the portal share borders, top, left, bottom, and the local3.js. We will also teach how to create tables and customized with the portal look. You'll be amazed at how easy it is to implement the portal look to your Web site after you take this class.

Prerequisites:

Basic knowledge in HTML

Notes:

- You need approval from your manager before enrolling to this activity.
